Viva Marking Sheet

Examiner marking for validation of the automated Viva Assessment System

1. How to use this sheet

Watch each recorded viva once and complete this sheet independently, before you look at the system's result. Mark every item from what you see and hear. The sheet follows the same three components the system uses, so your marks can be compared with the system's marks component by component.

Please do not guess what the system would give. If a component cannot be judged (for example, no face is visible), write N/A and leave it out of the average, exactly as the system does.

2. How the system marks (for your reference)

The official AI performance mark (/100) is the equal-weighted average of the available components below. A component with no usable data is dropped and the rest are renormalised. Facial emotion, eye gaze, head stability, blink rate and voice emotion are all scored inside these components. LLM comments do not change the mark.

Component	What the system measures	Weight	Your mark
A. Engagement	Frame engagement (CNN), facial confidence, facial emotion, on-camera gaze, head stability, blink rate	1/3	____ /100
B. Voice quality (audio)	Pitch stability, voice clarity (HNR), voice smoothness (jitter / shimmer), emotional tone of voice	1/3	____ /100
C. Speech delivery (transcript)	Speaking pace, hedge phrases, filler words, long pauses, complete sentences	1/3	____ /100

Quality gate. If no usable face is visible, the student is not speaking, or more than one person is clearly in frame, the system gives no mark (INCOMPLETE). Tick below if you would also refuse to mark this recording.

[ ] No usable face visible [ ] Student does not speak [ ] More than one person in frame [ ] Recording is fine to mark

3. Component marking

Score each item from 0 to 10 using the anchors. The component mark is the average of its items multiplied by 10.

A. Engagement (1/3 of the AI mark)

Item	Anchors (0–10)	Score	Notes
A1. Visible attentiveness	0–3: looks disengaged, distracted or bored. 4–6: mostly attentive with lapses. 7–10: consistently alert and focused on the task.	____	
A2. Facing the camera / examiner	0–3: often looking away or turned. 4–6: faces camera most of the time. 7–10: steady, natural eye contact throughout.	____	
A3. Facial expression / confidence	0–3: tense, uncertain or negative expression. 4–6: neutral or mixed. 7–10: relaxed, positive, confident expression.	____	
A4. Head steadiness	0–3: head constantly moving, tilting or turning. 4–6: some movement. 7–10: steady, composed posture.	____	
A5. Natural blinking	0–3: very frequent blinking (more than about 25 a minute) suggesting strain. 4–6: somewhat elevated. 7–10: natural, relaxed blinking.	____	
Component A mark	Average of A1–A5 × 10	____	= _____ /100

B. Voice quality (1/3 of the AI mark)

Item	Anchors (0–10)	Score	Notes
B1. Pitch stability	0–3: voice swings widely or sounds erratic. 4–6: some variation. 7–10: steady, controlled pitch.	____	
B2. Voice clarity	0–3: breathy, muffled or hard to hear. 4–6: understandable with effort. 7–10: clear, clean voice.	____	
B3. Voice smoothness	0–3: shaky, rough, trembling. 4–6: occasional roughness. 7–10: smooth and even throughout.	____	
B4. Emotional tone of voice (half weight)	0–3: sounds upset, harsh or flat. 4–6: mixed. 7–10: calm, neutral or positive tone. Count this item as half: use (B1+B2+B3+0.5×B4) ÷ 3.5.	____	
Component B mark	(B1 + B2 + B3 + 0.5 × B4) ÷ 3.5 × 10	____	= _____ /100

C. Speech delivery (1/3 of the AI mark)

Items C2–C4 are counts. Tally while you watch, then convert using the table that follows. This matches the system's own formulas.

Item	What to count / judge	Your tally (n)	Score 0–10	Notes
C1. Speaking pace	Words per minute. Best band is 120–160 wpm. Too slow or too fast scores 6.5; in band scores 10.	pace: [ ] in band [ ] too slow [ ] too fast	____	
C2. Hedge phrases	Tally: "I think", "I believe", "maybe", "perhaps", "sort of", "kind of", "I'm not sure but"	n = ____	____	

Item	What to count / judge	Your tally (n)	Score 0–10	Notes
C3. Filler words	Tally: “um”, “uh”, “uhh”, “umm”, “hmm”, “er”, “erm” (“like” is not counted)	n = ____	____	
C4. Long pauses	Silences longer than 2 seconds in the student’s answer	n = ____	____	
C5. Sentence completion	Share of sentences finished properly (not dropped or abandoned). Score = share × 10	about ____ %	____	
Component C mark	Average of C1–C5 × 10 (leave out any item you cannot judge)		____	= _____ /100

Conversion table for tallies (C2–C4)

Score out of 10 = 10 × (1 − n ÷ limit), never below 0. Limits: hedges 8, fillers 12, long pauses 6.

Count n	0	1	2	3	4	5	6	7	8	9	10	12+
Hedges (C2)	10.0	8.8	7.5	6.3	5.0	3.8	2.5	1.3	0.0	0.0	0.0	0.0
Fillers (C3)	10.0	9.2	8.3	7.5	6.7	5.8	5.0	4.2	3.3	2.5	1.7	0.0
Long pauses (C4)	10.0	8.3	6.7	5.0	3.3	1.7	0.0	0.0	0.0	0.0	0.0	0.0

(12+ for hedges means 8 or more scores 0; for fillers 12 or more scores 0; for long pauses 6 or more scores 0.)

4. Technical accuracy (only if “with technical accuracy” mode is used)

Use the table for the subject of this recording. These are the same concepts and weights the system uses. For each concept, mark how well the student’s answer covered it: 0 = not mentioned or wrong, 5 = partly correct, 10 = correct and clear. The technical mark is the weighted average (out of 10), calculated the same way the system combines concepts.

SE1030: software enginerring (12 concepts)

No.	Concept	Weight	Score 0–10	Weight × score
1	Unit Testing	5	_____	_____
2	Integration Testing	5	_____	_____
3	System Testing	5	_____	_____
4	Performance Testing	4	_____	_____
5	Security Testing	4	_____	_____
6	Smoke Testing	3	_____	_____
7	Sanity Testing	3	_____	_____
8	Black-Box Testing	4	_____	_____
9	White-Box Testing	4	_____	_____
10	Equivalence Partitioning	3	_____	_____
11	Boundary Value Analysis	3	_____	_____
12	Regression Testing	4	_____	_____
	Totals	W = 47		S = _____

Technical mark /10 = S ÷ 47 = _____

DS1030: DATABASE SYSTEM (15 concepts)

No.	Concept	Weight	Score 0–10	Weight × score
1	Entity	5	_____	_____
2	Entity Set	4	_____	_____
3	Attribute	5	_____	_____
4	Composite Attribute	3	_____	_____
5	Multivalued Attribute	3	_____	_____
6	Derived Attribute	3	_____	_____
7	Relationship	5	_____	_____
8	Cardinality	4	_____	_____
9	One-to-One Relationship	4	_____	_____
10	One-to-Many Relationship	4	_____	_____
11	Many-to-Many Relationship	4	_____	_____
12	Primary Key	5	_____	_____
13	Foreign Key	5	_____	_____
14	Weak Entity	4	_____	_____

No.	Concept	Weight	Score 0–10	Weight × score
15	ER Modelling	4	____	____
	Totals	W = 62		S = ____

Technical mark /10 = S ÷ 62 = _____

The technical mark is confirmed by the examiner and is never published automatically.

5. Final calculation

Step	Calculation
AI-equivalent mark /100	Average of the available components: (A + B + C) ÷ 3 = _____ /100. If a component is N/A, divide by the number of components used.
Mode without technical accuracy	Final mark = AI-equivalent mark = _____ /100
Mode with technical accuracy	Final mark = 0.5 × AI-equivalent + 0.5 × (technical ÷ 10 × 100) = _____ /100

Grade bands

A+	A	B+	B	C+	C	F	Your grade
90–100	80–89	70–79	60–69	50–59	40–49	0–39	

6. Overall examiner judgement

Give this mark first or separately, from your overall professional impression, without using the formulas above. It lets us check whether the formula-based mark agrees with an expert's overall view.

Holistic mark /100 (your overall impression)	_____ /100 Grade: _____
Would you publish the system's mark for this recording?	[ ] Yes [ ] Yes, with a small change [ ] No
If a change is needed, what mark would you give?	_____ /100
